

# Scrum 2

Team Vecna

Oct 18th, 2022

## Recap

- All of us have witnessed food being wasted at restaurants that could be going to people in need. So, we decided to implement something that would be of great help to shelters in Regina.
- Creating a PWA that will connect businesses and shelters on one platform without minimal effort.

# Status

- Yellow
- Still learning about the tech stack(React).
- Hit some roadblocks while deploying the site. Tried using Netlify but had some issues. In the process of figuring out AWS for deployment.
- Still need more Hi-Fi prototypes(mainly for the driver side).

## Tasks Completed

- Set up our coding environment.
- Created a RACI for proper segregation of work.
- Created Lo-Fi prototypes, Hi-Fi Prototypes and UML diagrams.

## Project issues

- Deployment
- Had a meeting planned with mentor, but it could not take place. New meeting set up for Wednesday.

# MVP 1

- Login page(for businesses/shelter/drivers)
- Sign up(businesses/shelters)
- Sign up(driver)
- Create a post(business)
- Request confirmation(shelter)
- Low level notification for drivers to pick up deliveries.
- Delivery detail page for drivers.
- Low level notification for shelters/businesses

## Up next

- Testing of Hi-Fi prototypes(Search Clinic).
- Framework of the code
- Begin coding MVP1.
- Keep learning React.
- Vlog 2
- Create database
- Meet with mentor(Wednesday,) to talk about deployment, general PWA questions and efficient use of Git.
